Yerevan, Armenia

Core Skills

Programing Language
- Bash
- Perl
- TCL
- C#
- Java
- Python

Programing framework
- .Net
- NUnit
- Selenium
- SpecFlow
- Flutter

Programing knowledge
- Algorithms
- OOP
- Data Structure
- Perforce
- Git
- REST API

Programing tools
- GitHub
- Postman
- Jenkins

software QA
- Manual Testing
- .Net Test Automation
- TDD , BDD ,KDD

Side Skills

Design
- Figma
- Adobe Xd
- UI & UX Design

Web Development
- WordPress
- CPanel
- E-commerce

Project Management
- Scrum, Agile Methodology
- Project Management

Electronic Engineering
- Electrical Drives
- Electronic Circuits
- Electronic Schemas & Diagrams

Profile

As a Senior Software QA Engineer with over seven years of diverse experience in the software industry, I bring a comprehensive skill set that includes expertise in automation and manual testing, My professional journey encompasses significant roles at Synopsys and EPAM, alongside a substantial freelance career.

At Synopsys, I honed my skills in test automation, test case creation, and bug diagnosis within a Linux environment, leveraging tools like Perforce VCS and Jira. My programming prowess in bash, TCL, Perl and Python, combined with my ability to create robust test frameworks, has been instrumental in ensuring high-quality software delivery.

During my tenure at EPAM, I specialized in .NET automation, utilizing Visual Studio Code, NUnit, Selenium, and SpecFlow. I am adept in various testing methodologies, including TDD, KDD, DDD, and BDD, and proficient in API and UI testing. My familiarity with GitHub Action and Jenkins has enabled seamless integration and deployment in agile workflows.

As a freelancer, I expanded my expertise to mobile app testing, focusing on both white box and black box testing, UI/UX design, and user experience testing. Proficient in Android Studio, Flutter Framework, Dart, and OOP, I have a strong foundation in UI/UX design tools such as Figma, Adobe XD, and Adobe Illustrator.

I am passionate about ensuring software excellence and thrive in dynamic environments where I can leverage my skills in QA engineering and other software development fields.
